### Compliant

Comply with government requirements with no effort

### Protected

Encrypted SSL connections are imposed on all protocols

### Secure

Hosted on our fully redundant Cloud service

### Easy

User friendly zero config setup

## SnakeStore

SnakeStore extends the SnakeMail service by archiving E-Mail messages in the SnakeWays cloud. SnakeStore adds long term storage of E-Mail messages. It keeps copies of all messages sent and received by a SnakeMail account and makes them accessible on shore. SnakeStore operates in real-time and is fully independent of the SnakeMail E-Mail delivery process.

### Unlimited

SnakeStore gives you unlimited, long-term storage and online access to all your SnakeMail E-Mail messages, both sent and received.

### Convenient

SnakeStore provides shore side access to all messages using either the SnakeStore Webmail interface or an E-Mail client application. You can view all messages that have been sent and received using the vessel's SnakeMail accounts.

### Flexible

In case of a connectivity failure on the vessel, you can reply to incoming messages using a PC, smartphone or tablet. You can hand over control to your superintendent to manage and direct communications and keep the ship up to date.

### Accessible

All messages are accessible through our easy-to-use Web interface, which provides a unique functionality to bulk download messages as compressed archives. Using secured standard IMAP, POP3, and SMTP protocols, you can access the SnakeStore archive using your preferred E-Mail application and copy or transfer messages into third-party mail services like Gmail, that support sharing messages from multiple accounts.

### Compliant

SnakeStore makes it easy for you to comply with government requirements for long-term message archiving. No need to set up your own storage systems or manage external services SnakeStore does it all for you with zero effort.

### Protected

Independent of your chosen access method, all connections to the SnakeStore data are only possible using SSL-encrypted protocols.

### Secure

SnakeStore is running on our SnakeCloud service with fully redundant server and storage instances.

### Easy

We set it all up for you. No user configuration is needed.
